Work Showcase

NOVIO - Salon Booking App

Launched - 18th June 2020

Purpose: Enable users to book Salon Appointments.

Developers: Hrithik Tiwari & Nirmal Mandal.

Technology: Flutter for front-end, Adonisjs and PostgreSQL for backend. Linode server as a Nodejs server.

Current Status: In a pause state, UI needs to be revamped before relaunching. Check out the listing [here](#).

Medical Stock - Medical Store Transactional Offline-First Software

The screenshot shows the MEDICA software interface. On the left is a dark sidebar with navigation links: Dashboard, Master Entry (selected), Category, Company, Doctor, Generic, Family Group, Item (selected), Kit, Message, Manufacturer, Patient Category, Patient, Item Type, Schedule, State, Supplier, Master List, Profile, and About Us. The main area is titled 'Add Item' and contains various input fields for item details like Item Code, Alpha Code, Name, Description, Packing, Loose Qty, Company, Manufacturer, Generic Group, Print Barcode, Check Expiry, and HSN Code. It also includes sections for Location, Bill Rate, Sales Rate, MRP, L Taxe, Min Bill Qty, Fixed Min Level, Fixed Max Level, Net Purchase Rate, Markup %, Margin, and Accept MRP. A keyboard shortcuts section at the bottom maps F1 through F12 to various master records: COMPANY MASTER, CATEGORY MASTER, ITEM MASTER, PATIENT CATEGORY MASTER, STATE MASTER, DOCTOR MASTER, KIT MASTER, PATIENT MASTER, and SUPPLIER MASTER. The footer credits 'Medical Stock by Wekex Company'.

Launched - First Week of May 2020
